## -Front-End Web Developer-

To Whom It May Concern:

I am really excited at the chance to apply to {insert} as a Junior Front-End Web Developer. I have just completed my certification of completion from Juno College's Bootcamp, as well I have a Bachelor of Arts degree with Honours in History from York University. After having read through your companies standards, beliefs and goals, I felt I had to apply and absolutely take a shot at having an opportunity to work with you!

In Juno College's Web Development Bootcamp, an intensive, and super fun-paced program. I gained hands-on experience building responsive and accessible applications with HTML5, CSS3/SCSS, JavaScript (ES6+), React, Firebase and REST APIs. I've also had the opportunity to create my own projects and collaborate in pair programming and group settings.

In addition to my coding background, my previous experience lay in customer service where I utilized my sales experience to handle large volumes of requests. I also effectively managed customer satisfaction to suit specific needs with open and transparent communication, along with active listening skills and being able to problem-solve the inevitable differing circumstances. In my time with group projects, I was able to transfer these skills over to creating a very open-minded, friendly and structured environment. Which allowed all of us to focus on our strengths and stay on track of our app goals. Not only did we work efficiently but we all really enjoyed spending our work time together. Being an effective team player was at the core of all these roles. While not everyone thrives in team roles, I believe that by leading with positive open communication can transfer over to your team members. Such as being able to effectively cope with last minute change. All of this creates an environment that allows members to comfortably handle uncertain situations while still being able to employ creative approaches from each differing member. My previous experience in team leading roles and training have really shaped this personal approach of mine, because regardless of rank, every member is absolutely key to completing a project.

I fully intend to bring my enthusiasm to this position, and I believe I am well suited to join your team due to my eagerness to learn and my commitment to the success of {insert} in any capacity. I also believe that my previous experience, coupled with my educational background, would make me a strong candidate to work as a Junior Front-End Web Developer. Thank you for your time and consideration in reading this. Feel free to visit my portfolio linked above and book a time in my google calendar for an appointment. I would love the opportunity to chat with you about this position.

*Sincerely,  
Eric Howell*
